A Gift
from Captain
Buscio

A Message from Donna Buscio

Dear Friends,

My late husband Captain Dominick Buscio was a dedicated fire captain of the Jersey City Fire Department. Dom was a wonderful husband, father, brother and son to his family, and a true friend to all who knew him. At the age of 39, his life was unexpectedly taken when he suffered a heart attack during our ski vacation. Dom was the picture of health. In fact, the results of a complete physical he had only 19 months before his death were normal, except for the presence of a moderately high cholesterol level. Since he was found to be healthy at that time, he decided not to return for his annual physical the following year. While many people his age make the decision not to seek regular checkups, in his case, it resulted in an inconceivable loss to all of us.

I am sharing our experience with others because I have found that my husband's death was not a rarity. Heart attacks are the largest single killer of firefighters. For that very reason, I created the program "*A Gift from Captain Buscio*," which began in Jersey City and now spans across the State of New Jersey to offer strictly confidential, comprehensive cardiovascular and pulmonary evaluations with no out-of-pocket cost to all firefighters and officers. These annual examinations are provided by board certified cardiologists and pulmonologists from Cardio Pulmonary Diagnostic, LLC or Deborah Heart and Lung Center.

My intention is not to instill anxiety. On the contrary, it's to provide an opportunity for peace of mind. I'm quite certain that this program would have had Dom's full support, given the current limited opportunities for our heroes to obtain physicals specific to their needs.

For me, this program, which was founded in Dom's memory, is an attempt to keep your occupational risk limited to fighting fires and crime.

This pamphlet provides you with details on the program and how you may benefit from it. If you have any questions or a concern regarding information other than what is available on the captainsgift.com website, contact me at dbuscio@captainsgift.com.

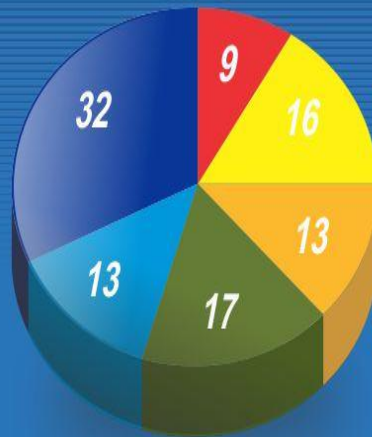

Sincerely,

Donna Buscio

STATISTICS TELL THE STORY

Activity During Cardiac Event

*Nearly half of all on-duty
firefighter deaths are due
to cardiac cause*

New England Journal of Medicine
"Emergency Duties and Deaths from Heart
Disease among Firefighters in the United States"

How "A Gift from Captain Buscio" Works

All current and retired firefighters, police, and emergency responders, and their officers are invited to participate in the program throughout the State of New Jersey. They will then have opportunity to receive confidential comprehensive Cardiovascular and Pulmonary medical evaluations. The medical facility will take the responsibility of billing the Participant's insurance provider. These annual examinations are provided by Cardio Pulmonary Diagnostic, LLC Care and also Deborah Heart and Lung Center, whose providers are Board-Certified Cardiologists and Pulmonologists who have generously offered firefighters, police, and emergency responders medical care that is specific to their profession.

All providers are board certified in the various specialties they provide. Testing will be provided based upon each participant's medical history. Testing may include laboratory, x-ray, pulmonary functions testing, and cardiovascular screening. Upon completion the participant will be provided with a medical report which they can use at their discretion.

All visits will be scheduled by appointment, the medical staff will direct you on what will be needed for the initial visit, such as bringing a list of all medications that you currently may be taking. In addition, fasting the previous night is required for blood work, which is part of the evaluation.
